

## Certificate

### Usability, Accessibility and UX Design

Master **CAWEB**

Faculté des Langues

Université de Strasbourg

### Why Choose this Program?

The Certificate “Usability, Accessibility and UX Design”, offered by the University of Strasbourg, is a career-oriented **fully online** program primarily geared towards graduates, employees, job seekers and career switchers in the field of usability and UX design who are looking to enhance and certify their expertise. Graduates will receive an official certificate issued by the University of Strasbourg upon completion, validating their knowledge and skills.

### Program – areas of study

- ◆ **UX design and usability**
- ◆ **User research**
- ◆ **UI and graphic design**
- ◆ **AI-Powered design tools and workflows**
- ◆ **Mobile optimization and usability**
- ◆ **Design accessibility and sustainability**
- ◆ **Interaction design and prototyping**
- ◆ **UX strategy**
- ◆ **UX writing for global markets**
- ◆ **Capstone project** (Report)

### Program format

The Advanced Certificate in Usability and UX Design program offers learning support with a combination of **live sessions** and **practical work**. Resources like reading materials, videos, and recordings are made **available 24/7** on the Moodle learning platform. Combining theory and practice, it includes lectures, workshops, and exercises. Participants will also complete a final project for **hands-on experience**.

### Key features

- ◆ **Duration:** 200 teaching hours
- ◆ **Dates:** October 22, 2026 to September 1, 2027
- ◆ **Mode of Study:** Fully online
- ◆ **Language of Instruction:** English
- ◆ **Tuition:** € 3 440 (payable in installments)

### Key takeaways and skills acquired

- ◆ **Master** usability principles across platforms, including mobile-first strategies and responsive design.
- ◆ **Conduct** research, gather and analyze data to inform user-centered design decisions.
- ◆ **Create** intuitive information architectures and prototypes using professional tools such as Figma.
- ◆ **Design** inclusive products addressing key accessibility considerations.
- ◆ **Develop** actionable wireframes and testable prototypes.
- ◆ **Apply** interaction design principles for dynamic and intuitive user interactions.
- ◆ **Craft** clear, engaging user-centered web content.

### Admission and enrollment process

To apply, candidates must ensure they possess a strong command of English, as well as a university degree or a significant professional experience. They should then submit a motivation letter and a CV through the online application form.

Once applications are reviewed, eligible candidates will be invited for an interview with the selection committee. Upon acceptance, students can enroll and pay the fees in installments.
